

HIPAA Compliant “Tele-Welfare” for Audio & Video Conferencing

There’s a strong possibility that the COVID-19 epidemic has changed *life* as we know it. No matter if one works in the public or private sectors, beyond obvious improvements in Internet bandwidth, social distancing and isolation requirements have reminded us once again of the great need to adopt more modern technology. And when it comes to Child Welfare, **VitalChild** has got you covered!

With VitalChild you won’t have to worry about the technology demands of the next national health crises, increased caseloads, or rural outpost assignments. By adopting VitalChild as your new CCWIS, a solution which simultaneously supports your Family First Act compliance needs, such challenges do not have to interfere with your future ability to quickly adapt, and ensure the wellness, safety, and continued delivery of essential services to your clients.

VitalChild is configured to consistently keep you one step ahead of what’s to come next. Our technology and child welfare experts have envisioned the strategies essential to optimizing your future services’ functionality and scalability. And bringing stakeholders together – even if virtually across distant locations – can enhance service delivery and outcomes. **Virtual Connect** enables remote:

- Secure Audio or Video Correspondence
- Case Management & Services Delivery
- Efficient Check-in & Wellness Visits
- Completion of Timely Evaluations
- Documentation of Call Logs
- Communication for Children and Parents Separated for Various Circumstances
- Video Team Meetings, Case Reviews, IEPs
- Expert Healthcare (Telehealth)

Security matters. In a crisis, regulations on confidentiality may be relaxed, but this is temporary. As a result, your solution should be safe, secure, and preserve the confidentiality of your clients’ information. You don’t want to rely upon using the same software every business and school is suddenly using during the next crisis. You don’t want products prone to overloads, hacks and glitches.

With **VitalChild’s Virtual Connect** being an embedded feature within our HIPAA compliant FedRamp Certified Platform, your communications are encrypted and protected while in transit and at rest. At **VitalChild**, our goal is to help you make a measurable difference. And with a never-ending collection of daily challenges in Child Welfare, we believe technology should offer you the ability to efficiently adapt, adjust, and continue to provide essential care to our most vulnerable children and families.
